

In-Wall Amplifier & Wireless Streaming Source

A0362

Channel Vision's new In-Wall Amplifier & Audio Streaming Source (A0362) is equipped with a built-in Bluetooth 4.2 module and 100W Class D Amp to provide an all-in-one solution to audio streaming and amplification. With the latest Blue tooth 4.2 technology, users enjoy longer streaming distances and more reliable streaming while using less power. The A0362 also features "deep sleep" mode to conserve power, enhanced device pairing, security, reliability, and acoustic enhancements.
