High-Powered Bluetooth Audio Kit

A0919

The A0919 high-powered audio kit includes the ARIA® 100 watt amplifier, A-Bus® Bluetooth Local source and volume control keypad. The flush mount amplifier is equipped with an RCA output which allows a secondary source to function as a local source override. Include in-wall or in-ceiling speakers and your preferred wireless system as your local override (SONOS pictured below) for a complete 2 room audio system.

System Configurations

Benefits

- RCA output allows users to switch between two sources
- Incorporate a universal input module (AB-301) to extend your system into another zone
- Kit Includes: A0350 Flush Mount Amplifier, A0129 Volume Control Keypad & AB-303 Bluetooth Audio Streaming Module
