

Bluetooth™ Wall-Dock for CAT5 Audio Systems

A0317

The Channel Vision A0317 is an on-wall Bluetooth™ docking station that will charge an iPod™ or iPhone™ using the Apple Lightning™ connector. The non-skid pad helps to hold the music player in place, while simultaneously playing audio and charging the device. The A0317 senses the location of your audio source in order to turn off as you leave a room and turn on in the room you enter. This feature also enables power-saving mode. Its elegant and contemporary design makes the A0317 perfect for anyone who wants to enjoy their music without defacing their wall.

KEY FEATURES

- Charges Lightning™ Devices**
- Mounts in a Standard 2-gang Box**
- Bluetooth Streaming**
- Senses Audio to Automatically Override the Main Audio Source**
- Provides a Standard RCA Line Level Output**
- Compatible with all Channel Vision CAT5 Audio Systems**
