

In-Wall Amplifier & Wireless Streaming Source

A0362

Channel Vision's In-Wall Amplifier & Audio Streaming Source (A0362) is equipped with a built-in Blue tooth 4.2 module and 100W Class D Amplifier to provide an all-in-one solution to audio streaming and amplification. With the latest Blue tooth 4.2 technology, users enjoy longer streaming distances and consistent streaming unlike competitive models while using less power. The A0362 also features "deep sleep" mode to conserve power, enhanced device pairing, customizable security code & security bypass link button (1st time link, 1-time only per device), superior transmission reliability, and acoustic equalizer enhancements from the IOS or Android App.

KEY FEATURES

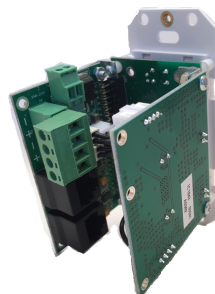

Blue tooth 4.2 Module
