

6.5" In-Wall Speaker

IW615

Channel Vision's ARIA 6.5" In-Wall Speaker features high power handling capability providing true stereo quality sound and not simply background music. The pivoting tweeters can be aimed in any position to custom fit any room making them perfect for home theater applications as well as whole-house audio. High quality materials ensure long life and great performance. Gold speaker terminals not only provide better contact surface but also offer less resistance to signal transfer for clearer sound.
