

## 4 Channel Network Video Recorder

### NVR-04N

Channel Vision's latest 4 channel NVR features smart-search & playback, HDMI video interface and watchdog monitoring to ensure that your surveillance system is accurate and reliable. The time & event search feature enable users to locate specific instances and events without the hassle of re-watching all of your recordings. The NVR-04N also facilitates the networking process by automatically finding and adding your IP cameras to the network.

### FEATURES

**Supports 5 Megapixel IP Camera for each channel**

**Supports HDMI Video Interface**

**Automatic networking (automatically finds and adds cameras to network)**

**Time-search & event-search**

**Real-time display & playback**
