

## Intercom Connect System

### P-0922

Channel Vision's Intercom Connect™ System enables users to forward front door intercom communication to their cell phone or to another phone number. Intercom Connect™ features 2 way communications to the front door and allows users to unlock the door by dialing a personalized pin code on their cell phone. The system is also equipped with built-in surge suppression that protects your entire front entry system from voltage spikes and shortages.

## FEATURES

**Compatible with P-0920 and P-0921**

**Built-in surge suppression**

**Option of 3 or 5 rings before forwarding intercom communication**

**12 vAC power supply included**
