

## IP Front Door Station

*For MDUs & Commercial Buildings*

### SIM Series

Channel Vision's IP Intercom Door Station combines keypad and contactless card entry with video communication to provide an all-inclusive IP solution to front door access control. The IP intercom system can be used with virtually an unlimited number of Touch Screens. Guests simply dial floor and unit number on the keypad to call to a unit, while residents can use either their ID card or a customized key code for convenient and secure entry. The SIM series intercom is compatible with the ST-3078 and ST-3108 IP Touch Screen room stations.
