4 Channel Network Video Recorder

NVR-04N

Channel Vision's latest NVR features intelligent search and playback technology that allows users to search for specific events based on motion, time, object identification, loss or occlusion. The NVR supports up to a 5 megapixel IP camera for each channel, as well as HDMI video interface. The NVR makes set-up simple with its auto-networking feature; it will automatically find and add your IP cameras to the network.

Features

- Smart Search & Playback
- Watchdog Monitoring
- Auto-networking
- Realtime Display & Playback
- Supports 5 MP IP camera for each channel

Benefits

- The NVR-04N will automatically find and add your IP cameras to the network.
- Watchdog monitoring ensures that your NVR does not stop recording without your knowledge, and will automatically restart your system if an error were to occur.
- The NVR is designed to support high definition (5 MP) IP cameras and HDMI video interface for top quality recording.
