

Front Door Intercom Amplifier Kit

TE-AMP

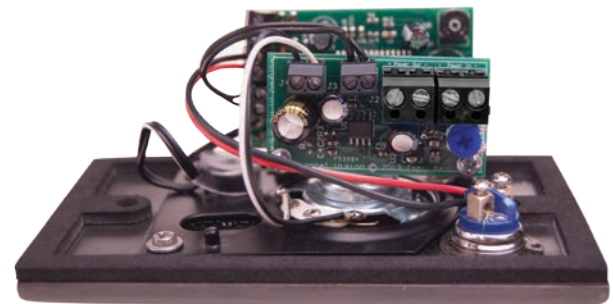

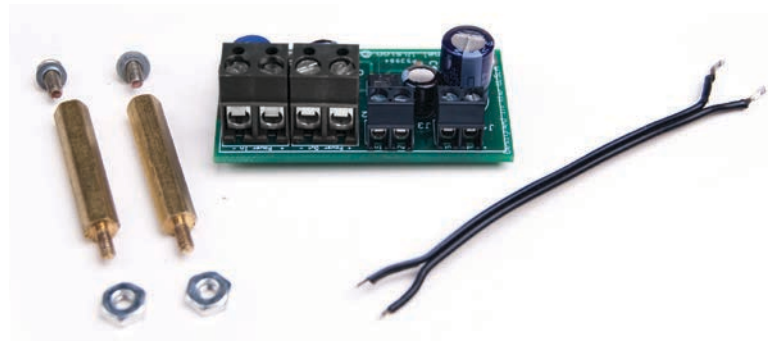

Channel Vision's TE-AMP kit provides added volume and clarity when DP and IU Series Door Stations are placed in conditions with excessive ambient noise. The TE-AMP Kit is an easy upgrade that can be done in the field or can be ordered with your next DP or IU Series Door Station. The TE-AMP Kit can be added to all existing Channel Vision door stations and only requires power be ran to the unit or use the existing power in the Door Stations with built in Cameras.

Features

- Simple on-site upgrade for existing DP and IU Series Stations
- Get power from existing Door Station Camera Power supply, existing CAT5 or external 12V power supply
- Compatible with Channel Vision Panasonic Door stations
- Clear Sound and Added Volume when door stations are placed in areas with excessive background noise

Kit Includes:

- (1) Amplifier Board (2) Screws (2) Washers
- (2) Stand-Offs (2) Nuts (1) 2x28 AWG Wire
